

# FRUITS

**Fruits** is a scientific journal for original articles and reviews on fruit crops, with a special mention to the underutilized Fruits and their nutritional qualities

## An international readership

*Fruits* is read in over 150 countries around the world. Your article will reach researchers on every continent, thus giving it wide visibility and impact on the international scientific community. *Fruits* established a partnership with *International Society for Horticultural Science* (ISHS).

## Scientific standards at all level

Run by international scientists, *Fruits* ensures the highest scientific standards as regards to the research material accepted for publication. The whole review process is overseen by our Editorial Board who select referees specialized in their field for each article submitted. Articles must be of the utmost relevance to today's fruits science issues to be accepted.

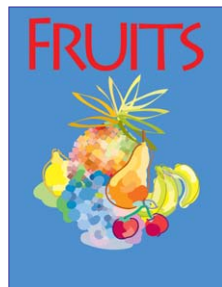

## Universal coverage of fruits world issues

*Fruits* is a scientific journal for original articles and reviews on fruit crops (botanical entry) in temperate, Mediterranean, subtropical and tropical regions. Fruits cover a wide range of subjects (agronomy, physiology, genetics, crop protection, postharvest storage, product processing and marketing) and a wide range of species, of which, for example, in 2007:

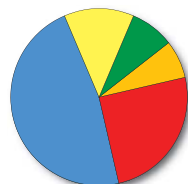

- *Actinidia deliciosa*
- *Citrus* spp.
- *Euterpe oleracea*
- *Ficus carica*
- *Grewia coriacea*
- *Litchi chinensis*
- *Malpighia glabra*
- *Mammea americana*
- *Mangifera indica*
- *Mauritia flexuosa*
- *Musa* spp.
- *Olea europaea*
- *Phoenix dactylifera*
- *Piper nigrum*
- *Pistacia vera*
- *Prunus dulcis*
- *Pyrus* spp.
- *Ricinodendron heudelotii*
- *Ziziphus mauritiana*

In each issue, *Fruits* presents a list of forthcoming meetings and new books published on the fruit topic. Moreover, a bi-lingual editorial (English/French) dealing with a topical subject is included.

From 2008, *Fruits* will publish, in each issue, protocol sheets making it possible to the researchers to transmit their own know-how for the realization of specific techniques.

## Fruits' readership by region\*

- Africa and Middle East: 13%
- Asia-Pacific: 8%
- Central and South America: 7%
- North America: 25%
- Europe: 47%

## Publications

Less than  
**3 MONTHS**  
from submission  
to acceptance\*

## Downloads

Articles downloaded\*

## Visibility

Read in more than  
**150**  
countries\*

\* in 2006

## At least 8 good reasons why you should publish in *Fruits*

### The highest scientific review standards

*Fruits* only select high quality articles. Your manuscript is reviewed by two or three international referees selected by the Editorial Board before being accepted for publication.

### Worldwide visibility

Your article is read in over 150 countries around the world.

### Easy linking

Using CrossRef database, the "Citing articles" tool lists all the articles citing the selected article. Together with the online reference links which give you direct access to all the major databases, linking is easy.

### Alert services

*Fruits* offers you free registration for the e-mail alert service that sends you an e-mail each time new articles are published online. And with RSS Feeds, the latest online article titles in *Fruits* are delivered directly to your desktop.

### Relevant indexing

*Fruits* is indexed in major databases: Biosis Previews • Biological Abstracts • CAB International (Crop Science Database, Horticultural Science Abstracts, Horticultural Science Database, Plant Breeding Abstracts, Postharvest News and Information) • CNRS/Pascal.

### Flexibility

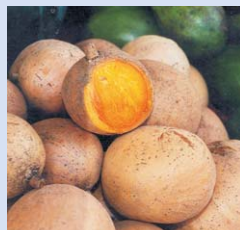

Authors have the opportunity to publish all their figures in color free of charge in the online version on *Fruits*' website.

### Copyright policy

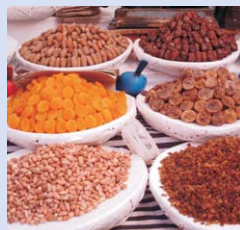

You are free to post your article on your own website or the site of your institute as soon as it is published, providing that the source is cited.

### No page charge

Submitting and publishing your article is free of charge, and 25 free reprints are sent to the first author.
